Name _____ Primary Phone Number _____

Current Address _____

Municipality of Murrysville enforces the 2009 Property Maintenance Code. The following updates are customary to residential occupancy permit requirements (Note that this does not limit the types of violations that may be cited during an occupancy inspection)

- Exterior maintenance of property
- Smoke detectors in each bedroom and on each floor (battery operated units acceptable)
- GFCI outlets within six feet of water including exterior, unfinished basement, garage, kitchens, bathrooms, laundry tub area, etc.
- Handrails when there are four or more risers present (pertains to interior and exterior stairs)
- Proper venting of hot water tank and furnace
- When a window is not present, mechanical ventilation is required in all bathrooms
- Fire extinguishers (Group R-2 & R-4 only)
- Electrical wiring in good condition
- Plumbing must be in compliance with the International Plumbing Code
- Integral garage ceilings must be completely separated from living space (fire rated 5/8" drywall)
- Must have solid wood/steel door between basement and an integral garage (20 minute minimum rating)

Please print clearly. Illegible and incomplete forms will not be accepted. Please remit payment of \$35 for the first unit and \$20 per unit thereafter. For structures with eight units or more, 25% of the total number of units will be inspected at the discretion of the Municipality. Check, cash, and money orders are accepted and made payable to the Municipality of Murrysville. No inspection will be scheduled without payment. Violations discovered during a requested Occupancy Permit inspection may not disqualify the unit from occupancy consideration but could result in a Temporary Occupancy Permit being issued with follow up re- inspection to ensure that deficiencies were corrected.

Signature of Applicant/Date: _____
